RE: XPS 13 9360 Battery Life After Latest BIOS Release  

You could also check the Battery Usage by App in the System Settings. Please type Setting onto the [Cortana] search box, click System, Battery, and select battery usage by app - see image below):

Note: Remove AC adapter before checking battery usage:

The screenshot shows the Windows Settings application. On the left, the 'Settings' app is open to the 'System' category, and the 'Battery' option is selected. A search bar at the top of the settings page contains the text 'Find a setting'. On the right, the 'Battery' settings page is displayed. It shows a battery level of 99% with a progress bar. Below the percentage, it says 'Estimated time remaining: 12 hours 55 minutes'. There is a link for 'Battery usage by app' and a section for 'Battery notifications' which states 'No notifications for battery life right now'.
