Is it a cute game with puppies? Yes. Is it a good puzzle game? Eh...

While the puzzles do work, and some of the mechanics feel unique, the game makes it very clear that it is a port of a mobile game: 3 star scoring system for levels, clearly optimized for touch screen controls, no "Quit" button on the home screen, etc. That's not fundamentally a bad thing, in this case it leaves the game with a general sense of unpolish. My biggest gripe is that every 4 levels you're returned to the level selection screen, even if you've unlocked the fifth level by getting all 3 stars on the previous ones. This means every 4 levels you have to scroll back through the pages of levels to go to the next as it always puts you pointed to the first level. The music is on the edge of being annoying where I'll leave it on for a while, then mute it.

I'll leave this review as positive as the tunnel and water stream mechanics make for unique puzzles. In many cases you have to form and re-form the lines to complete the levels, which I haven't encountered in similar puzzle games. However a lot of the appeal of the game is that it has dogs. Few of the levels really felt challenging, and throughout the 80 levels, I never really got a feeling of satisfaction upon completing a level, due largely to the things outlined above. It is a passable puzzle game, but if you're looking mainly for a puzzle game rather than a game with dogs, give this one a pass.

Most of the puzzles are fairly easy to figure out with a few that make you really think. If you like puzzle games, pick this one up!. This is the best game I have ever played in my entire life, compared to my other 100+ games I have this is without hands down the best I own.. It's a pretty fun puzzle game with levels of varying difficulty. New mechanics are introduced as you play, and while some of them are more fun than others, they're all pretty fun to figure out. It took me a little less than 3 hours to finish the 80 levels, which to me is quite fair.](#)

[Also the dogs are really cute.. they're good dogs Brent 12/10](#)

[\(On a serious note, it's like a light version of Snakebird. Quite fun\). More than entertaining enough to take the time to write a quick review on it. The game is engaging and will challenge your skills in figuring out how to make the puppies work together to achieve their goal of getting to their bowls. My only wish is that this game supported controllers.. A very relaxing puzzle game with no real pressures to deal with. Just have to get all the hams collected and the dogs to their end spaces. Easy to undo moves to try different ones.. A very nice and funny puzzle game;](#)

[Stretch dogs as long and around edges as you like, but don't forget to feed them. And as you want to be a good master, get all the extra ham for you good dog :\)](#)

[The difficulty is increasing nice and slowly, so you keep being motivated to solve the next puzzle.](#)

[Some minor critic:](#)

[The music is all the same for all levels, but as you are concentrating on solving the puzzles, you don't pay much attention to it.](#)

[Every fifth level there is a bonus level, but you are first presented the level selection screen, and always on the first page. So you have to switch pages again and again after level 25.](#)

[I also miss a menu item for quitting, so you have to press ESC to be able to quit the game.](#)

[It's a perfect game for in-between and works perfect on Linux!](#)

Simple yet adorable looking puzzle game.

Nice to pass the time with as well as easy to return to if you take a break or some time off from the levels.

If you are stuck on a level you can skip it and come back to it later which is nice and makes it more casual and less frustrating for puzzle fans.. A very fun and relaxing game. Starts off easy, but becomes more challenging as it progress. Looks great too!

<https://youtu.be/ViprFTMU-GY8>. Nice, fun, and cute puzzle game with soothing music. Try it out and you'll get sucked in!. Finally, some wholesome gameplay.. Nice little puzzle game. At root, it's the classic circuit-board thing where you have to connect pairs of terminals on a grid without crossing the lines, but with a couple of complications added. Reasonably short, too!. Nice and relaxing way to spend a couple of hours, with a well-handled difficulty curve and a few particularly clever puzzles along the way.. Very fun game all in all. 10V10 pupper cuteness. So happy. Much meat. Tail wagglin' adorable.

Pros:

-good difficulty curve

-11V10 pupper stretch

-lots of levels

-good music choice

-cute to boot

Cons:

-music gets a little repetitive, but that's about it

Fun for the whole family!. It ended up having more variants in the puzzles than I thought, which is great. It really is a fun, colourful, well thought out puzzle game. Some levels I had to think and move pups a lot to get the solution, others are very easy. There is no tutorial or words so it's good for all languages and the levels are clear enough for you to work out what to do.

Achievement hunters - all achievements are to get 3 hearts on each level. Just pick up every ham bone in level to get 3 hearts, then get your pup to eat out of his colour co-ordinated bowl to finish level. There are no timers (thankfully) and one dog can get all bones, not every dog has to get a bone. There are 80 levels. It's a good straightforward game to 100% on.

On some levels you have to make multiple small temporary moves from another pup to get the original pup into the right position, those were my favourite levels.

I wish there were a lot more levels but just because I loved the fun game, and I hope they make many more puzzle puppies sequels.

edit - cards were added after I finished, which took ages to drop. I think my true playing time in total was nearer to 3.5 hrs.. 13V10 Puptastic, would solve with puppies again.

Pros:

+ Dogs

+ Puzzles

Cons:

- No tummy rubs.. I really like it, and the puppies are cute - lily 7 years old.
